Overview

This knowledge article describes what **does** change with the implementation of SAP Ariba Supply Chain Collaboration (SCC).

Details

SAP Business Network & SCC

- Each Molex supplier needs to establish an account on the SAP Business Network
 - With the SAP Business Network, the supplier can access Molex information and other custom information
 - Unlike our legacy supplier portal (SupplierNet) which was custom built by Molex, SCC is a SaaS Application owned by SAP Ariba
 - The SCC application provides the supplier access to the SAP Business Network
 - Unlike SupplierNet, with SCC supplier manages their user accounts on SCC
 - Multiple supplier users can access the supplier account on SCC
 - With SCC we adopt industry standard processes
 - Unlike SupplierNet, Molex transactions are stored on the SAP Business Network
-
