

SUPPLIER SCORECARD OVERVIEW

MARCH 22, 2024

creating connections for life

molex

The scorecard will be calculated every month and consist of the previous 12-month performance for all supplier locations combined.

The Supplier Performance Scorecard will be based on 2 categories, quality and assurance of supply. These will further be broken down with quality being comprised of **QN rate and severity KPI**, **defective Parts Per Million KPI**, and **8D On-Time Completion KPI**.

The assurance of supply will be broken down by **percentage of on time to the Molex request date KPI** and the **percentage on time to the supplier commit date KPI**.

These KPIs will be combined by the categories of quality and assurance of supply.

The weighted sum of these Categories will make up the overall final score for the scorecard.
